^[1]Warning: Please note that a positive distribution yield does not imply a positive return. Investors should not make any investment decision solely based on information contained in the "Recent Distribution / Historical Distributions". You should read the relevant offering document (including the key facts statement) of the Sub-Fund for further details including the risk factors.

^[2]Yield is calculated based on the dividend per unit divided by the ex-date NAV per unit. It is for reference only and does not represent the performance of the Sub-Fund. All dollar amounts are in USD unless otherwise stated.

^[3]The net distributable income is the net investment income (i.e. include dividend income and interest income net of fees and expenses) based on unaudited management accounts.

^[4]The Sub-Fund pays dividend out of gross income while charging/paying all or part of the Sub-Fund's fees and expenses to/out of the capital of the Sub-Fund, resulting in an increase in distributable income for the payment of dividends by the Sub-Fund and therefore, the Sub-Fund may effectively pay dividend out of capital.
